SUMMARY

Software Engineering professional pursuing a BSc.Sp(Hons) in Information Technology at the Sri Lanka Institute of Information Technology (SLIIT), Faculty of Computing, with professional with **1 year of industry experience** in software development. Skilled in full-stack application development, REST API development, database management, and AI-powered solutions. Successfully contributed to multiple academic and industry-oriented projects, including machine learning-based applications and intelligent software systems. Passionate about Artificial Intelligence, Software Engineering, and emerging technologies, with a strong commitment to continuous learning, problem-solving, teamwork, and delivering innovative technology solutions that create real-world impact.

PROFESSIONAL EXPERIENCE

Associate Software Engineer

Jan 2026 – May 2026

PixelX Solutions (Pvt) Ltd, Kothalawala, Kaduwela Sri Lanka

- Develop and maintain scalable web applications and software solutions using modern development frameworks and technologies.
- Collaborate with cross-functional teams to design, implement, test, and deploy software solutions.
- Contribute to backend API development, database management, and application optimization.
- Participate in Agile/Scrum development processes, code reviews, and technical discussions.
- Support software maintenance, bug fixing, and feature enhancement activities

Intern Software Engineer

May 2025 – Dec 2025

PixelX Solutions (Pvt) Ltd, kothalawala, Kaduwela, Sri Lanka

- Assisted in developing and maintaining web-based applications and software components.
- Worked with senior engineers to implement new features and resolve technical issues.
- Developed and tested RESTful APIs, database operations, and frontend functionalities.
- Participated in software testing, debugging, documentation, and deployment activities.

EDUCATION

BSc Sp (Hons) in Information Technology – Software Engineering

2022 – 2026

Faculty Of Computing (FOC), Sri Lanka Institute of Information Technology (SLIIT)

Full Stack Developer Program (DP Education)

2023 – 2024

University of Moratuwa

GCE Advanced Level Examination

2020

Sri Gamini Central Collage, Kurunegala, Sri Lanka

SKILLS

Programming Languages: Java, Python, JavaScript, C, C++, PHP, TypeScript

Backend Development: Spring Boot, Node.js, Express.js, Java Servlets, REST APIs

Frontend Development: React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Mobile Development: Kotlin, Flutter, Android Studio

Databases: MySQL, MongoDB, Firebase, SQLite, PostgreSQL

AI / Machine Learning: Machine Learning, Predictive Analytics, Data Processing, Python ML Libraries

Tools & Technologies: Git, GitHub, Postman, Figma, Cloudinary, VS Code, Eclipse, IntelliJ IDEA, Google colab

Methodologies: OOP, Design Patterns, Agile/Scrum, SDLC

Soft Skills: Analytical-Thinking, Communication, Decision-Making, Innovate Mindset, Time Management, Attention to Detail, Teamwork & Collaboration, Problem-Solving

RESEARCH PROJECTS AI/ML

Smart Polypharmacy & Vitamin Recommendation System for Geriatric Patients - PolyCare

Technologies: Next.js, TypeScript, React, Tailwind CSS, Flask, Python, TensorFlow/Keras, Scikit-learn, OpenCV, Hugging Face Transformers, Pandas, NumPy, Firebase Firestore, Firebase Authentication, REST APIs, Vercel, Render

- Developed an AI-powered healthcare recommendation system for geriatric patients, identifying potential vitamin deficiencies, patient specific polypharmacy risks calculation and drug interactions with related adverse Drug event identify while providing personalized meal planning and lifestyle recommendations.
- Built 5 machine learning models to analyze health indicators among geriatric patients and support healthcare decision-making.

AI-Based Corn Pest Detection & Pesticide Recommendation System - Corn Guard AI

Technologies: Python, Flask, TensorFlow/Keras, EfficientNetB0, MobileNetV2, Pandas, NumPy, Pillow, Jinja2, JavaScript, Tailwind CSS, Google Cloud Firestore, Cloudinary

- Developed a full stack AI-powered corn pest detection web application using 10,000+ images dataset train model, achieving 93.95% test accuracy.
- Implemented expert-backed pesticide/IPM recommendations based on detected corn pest classes.

AI-Powered Travel Companion - Wanderlust

Technologies: AI/ML, React.js, Node.js, Express.js, MongoDB, Python, JWT, Tailwind CSS, Cloudinary

- Built an intelligent travel planning platform that predicts future weather conditions and generates personalized travel recommendations.
- Trained a machine learning model using 147,000+ historical Sri Lankan weather records.
- Developed booking, recommendation, chatbot, and social interaction features.

KEY PROJECTS

Stellar-Build ERP Management System

Technologies: MERN Stack, Material UI, GitHub, Figma, Postman

Developed modules for employee, inventory, customer, project, financial, and vehicle management for a construction company. Collaborated with an Agile development team to deliver enterprise-level functionality.

Code Sync – Developer Collaboration & Learning Platform

Technologies: React.js, Spring Boot, MySQL, OAuth2, JWT, Cloudinary

Designed a collaborative platform enabling developers to share code, track learning progress, and engage through real-time interactions. Contributed to database design, testing, and technical documentation.

Online School Information Management System

Technologies: Java Servlets, MySQL, HTML5, CSS3, JavaScript, Bootstrap, Apache Tomcat

Developed web-based school management system using OOP principles and software design patterns.

Diet Plan & Health Check-up System

Technologies: PHP, JavaScript, Bootstrap, MySQL

Health management platform providing diet recommendations and health monitoring features.

CERTIFICATIONS

- | | | |
|---|--|---|
| > AI/ML Engineer – Stage 1 (SLIIT) | > Master in Prompt Engineering and AI | > Auto-Healing and Scaling Applications (AWS) |
| > Prompt Design in Vertex AI Skill Badge | > Big Data and AI – Great Learning | > Highly Available Web Application (AWS) |
| > Cloud Web Application Builder- Training Badge(AWS) | > UI/UX Design – Great Learning | > AWS Simu Learn: File Systems in the Cloud |
| > Postman API Fundamentals Student Expert Badge | > Introduction to JavaScript – Sololearn | > Create a Website Using Word press |
| > Introduction to Amazon Simple Storage Service (S3) | > Introduction to Java – Sololearn | Free Hosting & Sub-domain – Coursera |
| > SQL (Basic) & SQL (Intermediate) – Hacker Rank | > Databases in practice - AWS | |
| > Create a canvas app in Power Apps | > Full Stack Developer Program – University of Moratuwa | |
| > Information Technology Discipline Certificate- SLTC | > Advance Programming in Python & Python for Beginners-UOM | |

LANGUAGES - English, Sinhala

LEADERSHIP & ACTIVITIES

- Member, IEEE Student Branch – SLIIT, Member of Gaming Community at SLIIT
- School Football Team Captain; Softball Cricket Player; Carrom Player
